PROFESSIONAL SUMMARY

Java Full Stack Developer with 2 years of production-grade experience designing scalable microservices, REST APIs, and enterprise integrations for GE Vernova's AeroAlliance platform. Proven track record of delivering high-availability backend systems using Java, Spring Boot, PostgreSQL, and AWS, complemented by practical exposure to Angular, CI/CD pipelines, and agentic AI workflow validation. Committed to writing clean, maintainable code and driving measurable business impact within cross-functional engineering teams.

EXPERIENCE

Genpact <i>Senior Associate - Java Backend Developer</i>	August 2024 – Present Hyderabad, India
- Designed, developed, and enhanced RESTful APIs and microservices using Java and Spring Boot to deliver scalable backend features GE Vernova's AeroAlliance platform, for an enterprise Cloud SaaS platform. - Optimized query performance and reduced system memory overhead by implementing pagination and sorting with Spring Data JPA, streamlining data workflows for large-scale datasets. - Partnered with the Angular frontend team to resolve API integration mismatches, strengthening full-stack debugging capabilities and ensuring seamless cross-functional platform delivery. - Resolved critical Docker build failures by migrating deprecated base images across microservices, performing root-cause analysis to eliminate production defects and standardize configurations project-wide. - Instrumented New Relic monitoring scripts across microservices to enable system downtime alerts, significantly enhancing production reliability and operational visibility. - Managed version control and CI/CD pipelines using GitHub and Jenkins, ensuring stable application releases within Agile sprint cycles. - Supported AWS cloud infrastructure (ECS, EC2, S3, VPC, CloudWatch) for production deployments, monitoring uptime, and troubleshooting infrastructure-related issues. - Wrote and optimized complex SQL queries in PostgreSQL using DBeaver, supporting backend data access and relational data modeling across production schemas. - Conducted functional testing of agentic AI systems performing multi-step autonomous tasks, identifying workflow gaps and gaining practical exposure to AI-driven software ecosystems.	

EDUCATION

Kakatiya Institute of Technology and Science <i>Bachelor of Technology in Computer Science and Engineering 8.47 CGPA</i>	May 2020 – May 2024 Warangal, Telangana
--	--

TECHNICAL SKILLS

Languages : Java, JavaScript, SQL, Python (Familiar)
Frontend : Angular, HTML5, CSS3, React (Familiar)
Frameworks : Spring Boot, Spring MVC, Spring Data JPA, REST APIs, Microservices
Core Fundamentals : Object-Oriented Programming, Data Structures, Algorithms, SOLID Principles
Databases : PostgreSQL (Query Writing, Optimization, Relational Data Modeling)
Cloud / AWS : ECS, EC2, S3, VPC, CloudWatch
DevOps & Tools : Docker, Jenkins, GitHub, Postman, DBeaver, New Relic
AI & Automation : Agentic AI Systems Testing, AI Workflow Validation

CERTIFICATIONS

Java Full Stack – Wipro
